OV VO

The looks, type and colour.

Every OVVO style, with the three faces it draws with and the four colours it is built from. The samples are set in the faces themselves; the hexes are the values the app writes.

Easter

Three faces, every style.

Header sets the page title and the look's own name. Subtitle sets section and card headings. Body sets every sentence, label and control. No style borrows a face from its neighbour: each names all three, and the gate fails any style that repeats one.
